👤 PROFILE

Software Developer with experience in **Python backend development, Frappe/ERPNext, REST APIs, JavaScript, Next.js, ERP customizations, and third-party integrations**. Experienced in developing custom DocTypes, document event hooks, business validations, backend APIs, scheduled jobs, workflow automation, and ERP integrations. Hands-on experience across **Finance, Accounts, CRM, HRMS, Inventory, Supply Chain, Manufacturing, and Service Management** applications, along with integrations involving **Tally, WhatsApp, Firebase/FCM, Razorpay, and mobile applications**.

👜 PROFESSIONAL EXPERIENCE

360 ITHUB Pvt Ltd. 🔗

Associate Software Engineer

09/2024 – Present | Bangalore, India

- Developed and customized **Frappe/ERPNext applications** using Python, JavaScript, custom DocTypes, document events, hooks, and controller extensions.
- Developed backend functionality for **ERP, CRM, HRMS, Finance, Inventory, Supply Chain, Manufacturing, and Service Management** workflows.
- Developed and maintained **REST API endpoints** for web and mobile applications, including authentication, data retrieval, transaction creation, and status updates.
- Built and integrated **web applications using Next.js and JavaScript**, consuming REST APIs and connecting frontend workflows with ERPNext/Frappe backend services.
- Implemented backend validations for business rules including pricing, invoice rates, lead data, inventory, financial transactions, and approval workflows.
- Developed scheduled and background processes for **notifications, attendance processing, leave allocation, reporting, and automated business operations**.
- Worked on ERP integrations with **Tally, WhatsApp, Firebase Cloud Messaging, and payment platforms**, including data synchronization and transaction processing.
- Developed **WhatsApp integration functionality** for instance management, connection status, credit validation, and message/document dispatch.
- Developed custom dashboards and **API-based reporting functionality** for operational, financial, HR, and service-management data.
- Worked with **QA and functional teams** to troubleshoot defects, validate functionality, and support application releases and production fixes. ::
